

# International Benchmark Test in Science (LEVEL 2)

## SCHOOL REPORT

### Sample School June 2007

This report shows how your school performed when compared to the students participating in the Trends in International Mathematics and Science Study (TIMSS). TIMSS is a large-scale international study of mathematics and science at Grade 4 and 8. Forty-six countries participated in the 2003 study. The average age of students participating at Level 2 was 14.5. For more information about TIMSS go to [www.timss.acer.edu.au](http://www.timss.acer.edu.au)
