Note: Mean and standard deviation are reported only where the group number is greater than 10. Comparative data is not provided if the comparison group has less than 100 students. In general, summary statistics of this kind should be interpreted with caution. Results showing a trend should be collected for a minimum of three years before conclusions about school-level performance are drawn.

1. Group 4: more than 55% of students in the school from an English speaking background.
2. "Other like schools" are those with a similar ratio of English speaking background students to non-English speaking background students.
3. n = Number of students
4. Means are expressed as ISA scale scores.
5. S.D. = standard deviation (expressed in ISA scale score points)
6. significance is calculated with a t-test.
