

What is the AUSSE?

The Australasian Survey of Student Engagement (AUSSE) is an annual survey of students enrolled in Australian and New Zealand universities and other higher and tertiary education providers. In 2012, 21,390 first-year and 25,464 later-year students from 31 universities, higher and tertiary education institutions took part in the AUSSE. 1000 students took part in the AUSSE at your institution.

The idea of student engagement captures how you interact with your institution, and how they can support your learning. Obviously, both these things are important for high-quality education. Your institution can use AUSSE data to improve your experience and outcomes. The AUSSE provides your institution with information on important things like:

- your experiences and activities
- the interactions you have with staff and other students
- your future study intentions
- your perceptions of the values and quality of your institution, and
- student demographics.

The AUSSE is managed by the Australian Council for Educational Research (ACER) in close collaboration with your institution. Further information about the AUSSE and the publications that result from this annual survey can be found at <http://ausse.acer.edu.au>.

What are students at your institution up to?

You know that you, and other students, have to put in a lot of time and effort to do well at your institution. So, how much work are students at Australasia University actually doing?

In a typical week, Australasia University students spend an average of 11 hours on homework, and 15% spend more than 20 hours a week studying. On average students complete 3 pieces of work that take less than an hour each week, and in an average week, 87% of students complete at least one piece of work that takes longer than an hour.

Australasia University students spend a significant amount of time reading and writing, and completing assignments. Over the course of a year, Australasia University students read an average of 8 assigned textbooks, books and subject reading packs. Students also write an average of 4 short assignments (less than 1000 words), 5 medium length assignments (between 1000 and 5000 words) and 1 assignment of more than 5000 words.

73% of Australasia University students say that they keep up-to-date with their study most of the time, and 68% of students usually complete their readings and assignments for class.

Apart from studying, what else are students at Australasia University up to?

Study is not the only thing that keeps students at your institution busy. 68% of Australasia University students work for pay either on or off campus, and students report working an average of 11 hours per week off campus and 1 hour per week on campus. Students spend an average of 5 hours per week travelling to campus with 9% of students spending more than ten hours per week commuting. On average, students spend 14 hours per week on campus, and 8 hours per week on campus when not in class.

Although students like you are very busy, they still make time for other activities. During 2012, 62% of students attended an art exhibition or performance, 50% exercised frequently and students read an average of 6 books for their own enjoyment.

What are students' plans for next year?

In 2013, most students at Australasia University plan to continue their current study (60%) or leave their institution having completed their qualification (16%). Others plan to change to another qualification (1%) or shift to a different institution (4%). Only 5% of students plan to leave before finishing their qualification.

Overall, most students (83%) rated their entire educational experience at Australasia University as good or excellent, and 86% would attend the same institution again given the chance to start over.

What does my institution do with the information?

The AUSSE results provide a foundation of evidence that can be used for planning and monitoring how your institution is engaging students. The AUSSE provides evidence for identifying areas where improvement in engagement can be achieved.

Institutions use the data in many ways, like:

- running seminars with students, managers and teachers
- comparing results between institutions
- preparing reports for specific divisions
- running student focus groups and interviews
- enhancing teaching practices and learning space designs
- holding institution-wide meetings to address problem areas, and
- integrating student management activities.

More information on the AUSSE, student engagement, and tips on how you and your institution can increase student engagement is on the AUSSE website: <http://www.acer.edu.au/research/ausse> .
